GA4 102 Micro-Application: Reporting & Insight

Track: Google Sample GA4

Date Range Used: Last 28 Days (Jan 23 – Feb 19, 2026)

Comparison: Previous Period (Dec 26, 2025 – Jan 22, 2026)

1. Module Completion Proof

Screenshot 1: GA4 102 Skillshop Course Completion Certificate

I successfully completed the “Dive Deeper Into GA4 Data and Reports” course in Google Skillshop, as shown above.

2. Evidence Screenshots

Figure 1: Traffic Acquisition Report – Last 28 Days

This report shows session performance by channel group for the last 28 days, including sessions, engaged sessions, engagement rate, and revenue.

Figure 2: Traffic Acquisition Report – Comparison to Previous Period

In the last 28 days, Direct traffic generated the highest number of engaged sessions at 11,275, reflecting a 2.48% increase compared to the previous period. Direct also drove the highest revenue at \$71,545.62, with a significant 46.73% growth. This suggests strong brand recognition and returning user behavior, as visitors are intentionally navigating to the site. While Organic Search remains an important contributor with 9,608 engaged sessions, it declined slightly. Based on these findings, the organization should continue investing in retention strategies such as email remarketing and loyalty incentives while strengthening SEO efforts to recover organic engagement growth.
